POI-HSLF - Java API To Access Microsoft Powerpoint Format Files

Overview

by Avik Sengupta, Nick Burch

1. Overview

HSLF is the POI Project's pure Java implementation of the Powerpoint file format.

HSLF provides a way to read powerpoint presentations, and extract text from it. It also provides some (currently limited) edit capabilities.

> **Note:**
> This code currently lives the [scratchpad area](#) of the POI SVN repository. Ensure that you have the scratchpad jar or the scratchpad build area in your classpath before experimenting with this code.

The [quick guide](#) documentation provides information on using this API. Comments and fixes gratefully accepted on the POI dev mailing lists.
